Education

Northeastern University — **Boston, MA**
Master of Science in Information Systems — *Sep 2024 – Jun 2026*

Nagpur University — **Nagpur, India**
Bachelor of Engineering in Computer Science — *Aug 2017 – Apr 2021*

Experience

Nokia — **Sep 2025 – Dec 2025**
Software Engineer Intern — *Sunnyvale, CA, USA*

- Engineered backend RAG AI agents using Python and LangChain, reducing manual QA workload by 70%
- Optimized Postgres vector queries to manage router testbed configuration data, improving system performance by 60%
- Implemented human-in-the-loop oversight via LangGraph node flows, ensuring 100% safety of router configuration data
- Designed and built ETL data pipelines to ingest and transform router testbed data into a PostgreSQL database

Accenture — **Jun 2021 – Jul 2024**
Software Engineer — *Mumbai, India*

- Contributed features to a GenAI-powered internal chatbot using React, C#, ASP.NET Core, and Azure
- Provisioned and managed Azure infrastructure (App Services, Load Balancers) for multi-tier applications
- Optimized SQL queries and implemented Redis caching, reducing API response latency by 35%
- Extended Microsoft Bot Framework dialogs by integrating Azure Cognitive Services (LUIS, QnA Maker)

Projects

Resume Builder Web App | GitHub (UI) | GitHub (Server) | React, Node.js, GCP Cloud Run, Docker — **May 2025**

- Designed a responsive Frontend using React and TypeScript to provide a seamless user interface
- Containerized the Node.js backend using Docker and deployed on Google Cloud Run for auto-scaling
- Integrated Gemini GenAI API to automate content generation, reducing user drafting time significantly

Personal Photo Gallery | GitHub | React, Node.js, Firestore, GitHub Actions — **Apr 2025**

- Built a full-stack application using React (UI) and Node.js/Express (API) for efficient media management
- Leveraged Google Cloud Storage and Firestore NoSQL database for scalable, serverless data handling
- Implemented DevOps best practices with GitHub Actions for continuous integration and deployment (CI/CD)

AWS Cloud Infrastructure | Terraform, EC2, IAM, Auto Scaling — **Jan 2025**

- Provisioned Infrastructure as Code (IaC) using Terraform modules for reproducible AWS environments
- Secured cloud resources with IAM roles and KMS encryption, ensuring strict security compliance
- Configured Application Load Balancers and Auto Scaling Groups to maintain 99.9% uptime

AI Course Advisor | GitHub | React, Redux, Node.js, Vercel/Railway — **Nov 2024 – Dec 2024**

- Developed a smart recommendation engine using Llama-70b LLM via Groq API integrated with a Node.js backend
- Managed complex frontend state using Redux and implemented secure JWT authentication
- Deployed the frontend to Vercel and backend services to Railway, ensuring seamless cross-platform integration

Technical Skills

Languages: Python, Java, TypeScript, C#, SQL, JavaScript (ES6+)
Frontend Technologies: React, Next.js, Redux, Angular, HTML5, CSS3, Material UI, Tailwind
Backend & Database: Node.js, Express, ASP.NET Core, Postgres, MySQL, MongoDB, REST APIs, Redis, GraphQL, ElasticSearch
Testing: JUnit, XUnit, Unified Functional Testing (UFT), Selenium, automation testing
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Terraform, Linux, CI/CD (GitHub Actions, Jenkins)
Certifications: Azure Developer Associate, Azure Fundamentals, Microsoft Certified Professional
